EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's attorney Diderico van Eyl on December 15, 2003.

The application has been amended as follows: cancel claim 13.

2. The following is an examiner's statement of reasons for allowance: Claim 7-11 and 14 are patentable over newly cited US Patent No. 6,423,110 B1.

The patent discloses a sintered body obtained by sintering a powder composition for capacitors, the powder comprises a tantalum or niobium and a compound having a silicon-oxygen bond in an amount of at least 0.5% by mass wherein at least a part of which is may be nitrided and has average particle size of from about 0.1 to about 5 microns (see abstract and col. 6, lines 25-28). The capacitor produced by this body has capacitance exceed 20,000 CV, see col. 7, lines 11-20.

The difference between the claimed invention and the patent is that Si present in the claimed invention is in the form of Si component, i.e. Si element and not bond to oxygen as required by the patent. While it is known to dope tantalum or niobium powder with Si as disclosed by the cited prior art, there is no teaching, reason or motivation include Si in the amount claimed by the applicants.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
